

FLASH

Field-Level Aircraft Scheduler

FLASH is an all-platform solution to rapidly generate, optimize, and adapt field maintenance schedules across the Logistics ecosystem.

FLASH is designed to:

- Save time by quickly drafting maintenance plans
- Optimize maintenance operations by using algorithms to find the best schedules from overwhelming possibilities
- Transform planning by making it easier to create and save contingency plans, capitalize on predictive maintenance alerts, allows opportunist maintenance to be effectively implemented, and more

IMPACTS

- Improve Logistics Planning
- Reduce Aircraft Downtime
- Optimize Supply Effectiveness
- Increase Force Generation
- Optimize Maintenance Resources
- Reduce Supply Chain Risk
